Summary

Full Stack Developer building production web applications with React, Next.js, TypeScript, and Node.js. Experienced in leading front-end teams, architecting design systems, integrating REST and GraphQL APIs, and collaborating cross-functionally with Product, Design, and QA in remote, fast-paced product environments.

Experience

Grupo Permaneo — São Paulo, Brazil
Full Stack Developer — *Jun 2025 - Present*

- Worked as a full stack developer on the company's flagship product, Subido PRO, bringing the project in-house from a third-party vendor to increase technical ownership, accelerate product evolution, and significantly improve the user experience.
- Integrated the React and TypeScript frontend with Node.js back-end services through GraphQL APIs, working closely with Product, QA, and back-end teams in a fully remote environment.
- Built high-performing, user-centric interfaces for FuncionarIA, a SaaS platform featuring multiple specialized AI agents, delivering intuitive workflows and excellent usability for its users.
- Designed and developed an internal CLI from scratch to scaffold new projects, standardizing project architecture, reducing setup errors, and accelerating delivery, with comprehensive documentation built using Fumadocs.
- Collaborated cross-functionally with Product and Design stakeholders to define, refine, and roll out new features, ensuring high code quality through code reviews and documentation.

Blue Saúde — São Paulo, Brazil
Front-End Developer — *Jul 2024 - Jun 2025*

- Architected the company's Design System using React, TypeScript, Turborepo, and Storybook, creating independent, reusable UI and styling packages that reduced development time for new projects by 35%.
- Published reusable React component packages to npm, ensuring visual consistency across all applications and reducing integration time for new projects by 50%.
- Drove refinement of scalable UI components and best practices, improving maintainability and code quality across multiple product teams.

Anjun Express — São Paulo, Brazil
Software Developer — *Oct 2023 - Jul 2024*

- Led the Front-End team in building a scalable Warehouse Management System (WMS) using Next.js, React, and Tailwind CSS, improving inventory management efficiency by 40%.
- Integrated RESTful APIs across the frontend, reducing request processing time by 30% and improving overall interface responsiveness.
- Developed solutions to manage inbound and outbound product flows in large distribution centers, improving item tracking accuracy by 25%.

Skills

- **Front-End:** React.js (18+), Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS
- **Back-End & APIs:** Node.js, NestJS, GraphQL, RESTful APIs (design & consumption), TypeORM, Front-End / Back-End Integration
- **Architecture & Best Practices:** Clean Architecture, Scalable and Modular Architectures, Micro-Frontends, Component-Based Development, Code Reusability, Performance Optimization
- **Design Systems & UI:** Enterprise Design Systems, Storybook, Turborepo, UI Standardization and Scalability
- **Testing:** Jest, Vitest, React Testing Library, Cypress, Playwright
- **Tools & DevOps:** Git, Version Control, CI/CD, Monorepo Architecture, npm, AWS
- **Methodologies & Collaboration:** Scrum, Kanban, Code Reviews, Cross-functional Collaboration with Product and Design Teams

Education

Universidade Cidade de São Paulo — São Paulo, Brazil
Bachelor's Degree in Computer Science — *Feb 2023 - Dec 2026*

Etec Parque Belém — São Paulo, Brazil
High School Diploma with a Technical Degree in Systems Development — *Feb 2020 - Dec 2022*

Languages

- **Portuguese:** Native
- **English:** B2 (Upper-Intermediate)

Certifications

- Systems Development Technician (Dec 2022)
- Computer Assembly and Maintenance (Feb 2023)
